Remote Sensing and Archaeology

Remote sensing techniques in archaeology are an increasingly important component of the technical and methodological tool set available in archaeological research. The use of remote sensing techniques allows archaeologists to uncover unique data that is unobtainable using traditional archaeological excavation techniques.

Satellite Remote Sensing for Archaeology
Sarah H Parcak
December 17th, 2018 - This handbook is the first comprehensive overview of the field of satellite remote sensing for archaeology and how it can be applied to ongoing archaeological fieldwork projects across the globe.

Digital Methods and Remote Sensing in Archaeology
December 24th, 2018 - Digital Methods and Remote Sensing in Archaeology. This volume debuts the new scope of Remote Sensing which was first defined as the analysis of data collected by sensors that were not in
Remote sensing
Wikipedia
December 29th, 2018 - Remote sensing is the acquisition of information about an object or phenomenon without making physical contact with the object and thus in contrast to on site observation especially the Earth. Remote sensing is used in numerous fields including geography land surveying and most Earth Science disciplines for example hydrology ecology meteorology oceanography glaciology geology it

Remote Sensing An Open Access Journal from MDPI
December 30th, 2018 - Remote Sensing ISSN 2072-4292 is a peer reviewed open access journal about the science and application of remote sensing technology and is published monthly online by MDPI. Open Access free for readers with article processing charges APC paid by authors or their institutions. High visibility indexed by the Science Citation Index Expanded Web of Science Scopus Ei Compendex and

Jobs in Remote Sensing Earth Observation and GIS
December 31st, 2018 - Jobs Earthworks advertises worldwide careers jobs and employment opportunities in Remote Sensing Earth Space Satellite Observation and GIS
GIS amp Remote Sensing
Eco Logical Australia
December 31st, 2018 -
We are a leading provider of Geographic Information Systems GIS mapping services and remote sensing With one of the most experienced natural resource GIS teams in Australia we provide clients with tailored solutions in data provision developing and implementing spatial data for project applications and effective management protocols
